

# How to Upload PDFs to your website

1. Hover over BSK PDF Pro.
2. Click on PDF Documents
3. Click “Add New”

# How to Upload PDFs to your website

The image shows two versions of the 'BSK PDF Document' form, separated by a jagged vertical line. Red arrows and numbered circles (1-5) indicate the changes made in each step:

- Step 1:** The 'Category' checkbox for 'Gusher' is checked in the right version.
- Step 2:** The 'Use file name as title' checkbox is checked in the right version.
- Step 3:** The 'Exclude extension(.pdf) from title' radio button is set to 'Yes' in the right version.
- Step 4:** A file named 'June 2017.pdf' is selected in the 'Upload new' section in the right version.
- Step 5:** The 'Save' button is highlighted in the right version.

The form fields include: Category, Title, Use file name as title, Use WordPress Media Uploader, Upload new (with 'Choose File' button), Date, Publish Date, Expiry Date, and a 'Save' button. Text below the file selection indicates 'Maximum file size: 256 M bytes. To change this p' and 'Only .pdf allowed.'

1. Select the category you would like (This example is Gusher).
2. Click "Use File name as title"
3. Click "Yes"
4. Choose the PDF that you want to use.
5. Save.
